

Dow February 2023 ACNCG update

Dow Remediation works

Major remediation works completed in the third quarter of 2022 were:

- Offsite thermal treatment of 3,116 tonnes of impacted soil;
- Injection of 182 m³ of Enhanced In Situ Bioremediation (EISB) amendments to treat groundwater;
- Offsite disposal of 13 skip bins containing material impacted by mercury and asbestos.

In addition to those major works, operation of the soil vapour extraction system (SVE) continued, rounds of soil vapour and groundwater monitoring campaigns were conducted on-site and offsite and a number of interpretative reports were produced to support the implementation of the CUP.

Dow Business

- Storage and distribution from the warehouse ceased in December 2022.
- Demolition of unused buildings and the former manufacturing and utilities facilities is complete. The demolition contractor will demobilize during February 2023
- Discussions and planning for Advanced Plastics Recycling by Advanced Recycling Victoria are continuing. This would include re-purposing of the existing warehouse and construction of new processing plants and buildings on the site.
