

# SOLVE ALTONA

## ACNCG Update

Dino Adikaram

October 2023

ENVIROPACIFIC

# Operational Update

- Solve continues to take contamination away from Hobsons Bay City Council and infrastructure projects alike:
    - ❑ West Gate Tunnel Project, North-East Link, Melbourne Airport Rail etc
  - Site wide D&A testing completed in September (Monthly random testing also occurring).
  - Solve is in the process of applying for a Licence and Permit Increase of 100KT to 300KT to manage higher volumes of lower contaminated waste streams.
  - **Shed expansion project has been completed, and now operational**
  - **Approximately 18,000 tonnes of contaminated soil successfully treated in Q1 FY23**
  - **Approximately 12,000 tonnes of NDD slurry have been processed with aggregates, sands, clays and water recovered.**
  - **Continuing to operate 5-6 days per week**
  - **NDD Plant increased hours (open till 10pm daily) Operating successfully and further assessing viability of longer operational hours**
-

# HSEQ

- **Safety**
  - 0 Lost Time Injuries
- **Loss of Containment**
  - No Events
- **Workcover**
  - No reportable incidents
- **Greater Western Water**
  - No reportable events
- **EPA**
  - 1 reportable incident, emissions exceedance

An overview photo of the site in operation.

# Enviropacific Corporate Update

- Enviropacific continues to be Australia's largest remediation contractor.  
Recent won projects include:
    - Origin Brompton Gasworks (SA)
    - RAAF Townsville (QLD)
    - Waratah Gasworks (NSW)
  - A new EPA approved facility has been constructed in Stawell to recycle end of life acetylene bottles. An Australian first.
  - Corporate change in structure for Water and Resource Recovery pillars of the business to be incorporated into one larger division.
-

# Future Community Actions

- A site tour of the Enviropacific Solve Facility is to be organised for members of the ACNCG.
  - If you would like to have a walk through prior to then, please let us know a time that suits you
  - Other ideas and suggestions to [Solve@enviropacific.com.au](mailto:Solve@enviropacific.com.au)
-

A hand is shown at the bottom left, holding a large, billowing cloud of fine, reddish-brown dust or soil particles that rises and spreads across the upper two-thirds of the frame against a solid black background. The dust is captured in mid-air, creating a sense of movement and volume.
