

Dow February 2022 ACNCG update

Site updates

Continuing preparation for demolition of decommissioned facilities.

EPA licence officially updated in December 2021 in line with the requirements of the new Environment Protection Act.

No workplace health and safety or environmental incidents since last the last update.

Remediation updates

During the first two months of 2022 major works in the field included the treatment of approximately 900 tonnes of impacted soils by Solve, which was performed in February. Maintenance and monitoring activities were also performed in the field to ensure seamless operation of remediation currently underway.

The Annual Progress Report was submitted to the EPA in February, as required by the current Clean Up Notice.

In parallel technical reports required to develop the new Clean Up Plan (CUP) are progressing to schedule. The CUP remains on track to be submitted to the EPA by the end of May 2022.
