

# **Dow Chemical 2017 Review for EMT**

15<sup>th</sup> Aug 2017

## Dow updates: June to August 2017

- Company Updates
- Operational Highlights
- Regulatory Compliance

# Company Updates

## 1. Safety Case

- Bow tie diagrams are being completed
- Consultation with MFB on Emergency Plan/Site Review
- Submission due October 2017

## 2. Personal injury

- ZERO recordable injury since May 2016

## 3. Process Safety Containment Event

- Phosphoric acid containment loss to Trade Waste on 19/6/2017 (reported to WorkSafe) and corrective actions taken

## Operational Highlights

- ‘Intervention is a Gift / Taking Unnecessary Risks’ safety program was successfully rolled out among ANZ sites.
  - Focus on the importance of intervention when encountering risky behaviour and how best to approach people.
  - Regional effort to continue improving the company safety performance across offices, field stations and manufacturing sites
- Successfully completed mini-turnaround in the end of May for equipment and cooling tower inspection.
- Focus on Energy Efficiency Improvements Project to reduce;
  - Energy intensity
  - Greenhouse gases

# Regulatory Compliance

## EPA:

- Annual Performance Statement (APS) and National Pollutant Inventory (NPI) reporting due end of September
- Major Industries Assessment actions– pending EPA's comment

## Worksafe:

- 1 reportable event – phosphoric acid release to trade waste
- 3 oversight visits YTD

## City West Water:

- Full compliance to Trade Waste Agreement for 2017 YTD.
