

Dow Chemical 2019 Review for EMT

6th Aug 2019

General Updates

- In May 2019 Dow announced the intention to cease manufacturing at the Altona site
- Manufacturing operations at the site have begun to wind down, and deliveries of Altona manufactured products will cease by year end
- Dow will retain a warehouse on the site to supply imported products to the local market
- Remediation activity and tenant operation on the Dow site is not affected

Environment, Health & Safety Performance Update

1. Personal injury

- One injury requiring medical treatment
 - Contractor required stitches to a finger cut that occurred when handling grating

2. Process Safety & Containment Events

- Zero recordable containment loss events
- Most recent Process Safety Event was in Mar 2018

Regulatory Compliance Update

EPA:

- No Reportable events
- Annual Performance Statement (APS) and National Pollutant Inventory (NPI) reporting due end of September

Worksafe / Major Hazard Facility:

- No reportable events
- Annual inspection was completed in January 2019 with no major findings

City West Water:

- No license condition exceedances
