February 2024

ENVIROPACIFIC

# Operational Update

- Solve continues to take contamination away from Hobsons Bay City Council and infrastructure projects alike:
    - ❑ West Gate Tunnel Project, North-East Link, Melbourne Airport Rail etc
  - Site wide D&A testing completed in Jan (Monthly random testing also occurring).
  - A Clean Up Australia Day celebration is happening on the 28<sup>th</sup> February at Solve and DOW. We will be cleaning up the entire site boundary.
  - Applications for growth of Solve site are going in to HBCC and EPA in March 2024.
  - **Approximately 15,000 tonnes of contaminated soil successfully treated in Q4 FY23**
  - **Approximately 10,000 tonnes of NDD slurry have been processed with aggregates, sands, clays and water recovered.**
  - **Continuing to operate 5-6 days per week**
  - **NDD Plant increased hours (open till 12am daily) Operating successfully and further assessing viability of longer operational hours**
-

# HSEQ

- **Safety**
  - 0 Lost Time Injuries
- **Loss of Containment**
  - No Events
- **Workcover**
  - No reportable incidents
- **Greater Western Water**
  - No reportable events
- **EPA**
  - No Reportable Events

An overview photo of the site in operation.

# Enviropacific Corporate Update

- Enviropacific continues to be Australia's largest remediation contractor.
  - A new EPA approved facility has been constructed in Stawell to recycle end of life acetylene bottles. An Australian first.
  - SA Operations have dramatically increased with a 50% growth in the last financial year.
-

# Future Community Actions

- A site tour of the Enviropacific Solve Facility is to be organised for members of the ACNCG.
  - If you would like to have a walk through prior to then, please let us know a time that suits you
  - Other ideas and suggestions to [Solve@enviropacific.com.au](mailto:Solve@enviropacific.com.au)
-

A hand is shown at the bottom left, holding a large, billowing cloud of fine, reddish-brown dust or soil particles that rises and spreads across the upper two-thirds of the frame against a solid black background. The dust is captured in mid-air, creating a sense of movement and volume.
