### Loss of Containment

Two minors spills in bunded area. 100% caught and diverted into water treatment plant

### Workcover

No reportable incidents

### City West Water

No reportable incidents

### EPA

One industry surveillance visit in April

One virtual inspection to verify completeness of additional treated soil storage in April

### Current operations

Continuing to operate 6 days per week, some maintenance occurring on the 7<sup>th</sup> day.

Primary volume continues to be from Enviropacific's remediation project at Fitzroy Gasworks, with some volume from recently commenced project at Deer Park. Numerous smaller projects also being serviced at Altona.

Solve have a number of Section 30As approved by the EPA, which allows production trials to confirm effective treatment. March trials were deferred due to some equipment reliability issues. Now scheduled for July.

COVID-19 monitoring programmes have identified 4 cases where non-symptomatic individuals declared exposure to potential affected persons. In each case, the person was tested and isolated until result received from clinic. All have returned negative results before returning to work.

### OHSE Improvements

OHSE training delivered to all on site re Confined Space retrieval and Minor Incident Response training at ERGT.

Fugitive odour programme identified some odour from storage shed ventilation points (now covered) and recyclable metals (sifted from soil received for treatment) being stored for cleaning prior to removal (options still being evaluated) .
